HOW TO CARE FOR YOUR
POINSETTIA

Water:

I am a semi-tropical—I like to be moist. Don't let me get completely dry—or drown me with water. (I don't like having my feet wet—so after you water throw any excess out.)

Light / Temperature:

I like a bright spot indoors. I absolutely, positively do **not** like the cold. Please keep me above 60° and away from chilly windows, drafty doors and breezy furnace vents.

Transportation:

To take me home or to a friend or loved one's house please be sure I am wrapped up when I go outside. Once I am inside you can unbundle me to let me breath.

Do you want to attempt to make me bloom again?

There are some resources online from Purdue and Michigan State University that will tell you how. Here is one to try: www.aces.uiuc.edu/vista/html_pubs/point/point.htm (Whew that's a keyboard full!)
